ABOUT ME

Hello, I am Ziya, a software developer specialized in frontend and mobile development. I gained experience in the industry through an internship as a frontend developer at SNI Technology and later worked as a frontend developer at Karga Karga. Currently, I have been working as a Frontend Developer at Coza Digital for nearly a year.

I have a wide range of skills in software development. I am particularly proficient in modern React technologies such as React Hooks, React Router, and React Redux. Additionally, I can create dynamic and real-time applications using Firebase.

On the backend side, I have a strong knowledge base. I can build RESTful APIs with NodeJS and Express and design interactive applications using socket.io. I am experienced in database management and can work with PostgreSQL to manipulate data effectively.

I am adept at using version control systems like GIT and Github to manage my projects efficiently. I am also skilled in using IDEs such as Android Studio, Eclipse, and Visual Studio. I have a solid understanding of OOP principles in Java and can create backend projects with Java Spring Boot.

I am proficient in English at a C1 level. I successfully completed English preparatory education at Duzce University and ranked third in the Computer Engineering department at the same university. My thesis during my studies also earned me a third-place award. To gain international experience, I participated in the Erasmus study mobility program at Lodz University of Technology.

With my knowledge and experience in frontend and mobile development, I aim to contribute to the design of creative and user-friendly applications and successfully complete projects. I keep myself up-to-date with the ever-evolving world of software development and enjoy learning new technologies.

WORK EXPERIENCE

15/11/2022 – CURRENT İstanbul, Türkiye

SOFTWARE DEVELOPER COZA DIGITAL

- We are creating strong web applications in the fields of finance, e-commerce, and environmental sustainability using React in the frontend and Node.js and Nest.js in the backend.
- We prioritize user experience above all else to ensure our customers receive maximum benefit.

12/07/2021 – 12/08/2021 İstanbul, Türkiye

INTERN SNI TECHNOLOGY

SNI Technology is a regulation compliance partner company and I worked at the department of the Frontend Solutions. My tutor was Sr. Canfer Beyazal and we build a React Native Project.

07/09/2022 – 14/11/2022 İstanbul, Türkiye

SOFTWARE DEVELOPERS INOVATIM (25 PROJE TEKNOLOJİ)

- Developing Web applications

08/07/2020 – 08/08/2020 Istanbul, Türkiye

INTERN UZMAN CRM

This job was my first internship. I mainly focused on my projects rather than company's and improved myself at C# and Unity.
